REMOTE CONTROLLED VEHICLE OFF ROAD EDGE MAINTENANCE UNIT

Designed for laying road shoulders of up to 500mm wide

Facilities as Follows;

- The unit will sweep the 500mm area to be laid, spray emulsion onto the swept area and lay the hot mix/cold mix onto the prepared surface, all in one pass.
- It is also possible to do the each task individually.
- Material can spread to a width off up to 500mm.
- Fully cabin controlled. The broom, emulsion edge spray and rear discharge are externally hand remote radio controlled if required.
- Spreading width & depth are adjustable.
- Pressure adjustable air cylinder, forcing the EMU onto the road surface.
- A guide pole is located at the front of the vehicle & is adjustable.
- Repairing of road shoulders using gravel or crushed rock is obtainable.
- Hydraulic operated winch system is supplied with hold back valve facility.
- This unit to operate places the rear, off or left hand side vehicle wheels onto the road shoulder & off the road edge.
